EXPERIMENTS IN KÖCHI: EARLY RESULTS

Sugar content: time analysis

	Control	Experimental	Difference
1st month	9,5±0,8	10,5±0,4	+1
2nd month	10,4±0,5	12 ±1,3	+1,6

Spatial analysis (over the 2 months):

Experimental: 11,34±1,25' (n = 7)

Classical music (Ravel): 10, 24±1, 16 ($n = 5$)

Next to heating: 10, 17±1, 13 (n = 6)

True control: 9.72 ± 0.75 ($n = 18$)

The difference in sugar content between experimental and control tomatoes is highly significant.
